

PAVING THE WAY TO AUTOMATION in the Animal Facility

Käfig-Nr.: GSW-01066	Stammbezeichnung: 133-R26-Cre-ERT2
Maus	
Besetzung: Gesamt: 2, M 1, W 1	Zuchtkäfig: ☒ angesetzt: 16.04.18
Arbeitsgruppe/Verantwortlicher (Tel.-Nr.): WART/ Friedrich Schiller (—)	
Aktenzeichen/Kurzbez. des Versuchs:	
Genehmigter TV ☐	Dokumentation ☐
Angezeigter TV ☐	
Herkunft der Tiere: Eigenzucht Universität Regensburg	
Datum Eingang/Abgesetzt: 22.03.18, 30.05.18	
Tiere bereits im Versuch? ☐	

Kz./Tat.	X	Genotyp	Geb.
GSW-99626	M	KCNJ15 +/- (KCNJ16 +/-)	20.02.18
GSW B268	W	KCNJ15 +/- KCNJ16 +/-	10.04.18
GSW-4924	W	KCNJ15 +/- KCNJ16 +/-	10.04.18

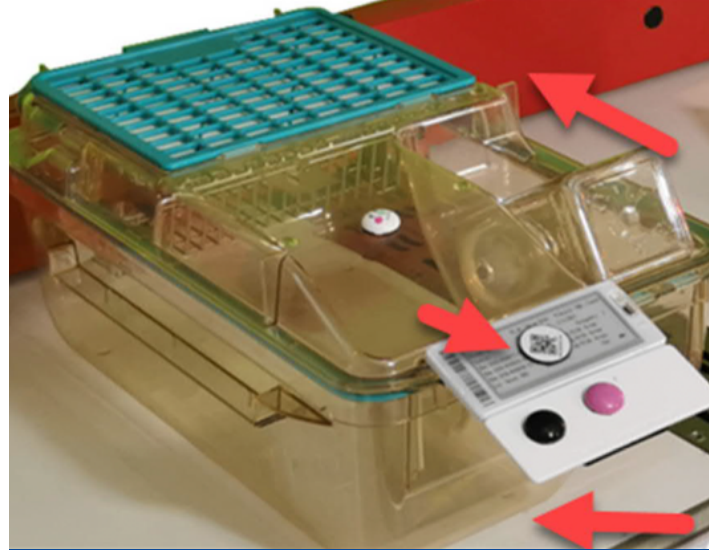

CageTalkers®, the electronic cage cards, are the gateway to automation in the animal facility. They eliminate unnecessary steps associated with traditional paper cards, reduce handling effort, and prevent mix-ups. More than just a digital replacement, CageTalkers serve as the crucial link between the rack (DVC), changing station, and animal management system.

True to their name, CageTalkers "speak" by displaying context-sensitive watermarks—such as the next required step after a mating or birth—directly on the cage display, precisely when it's needed.

This allows users to stay focused on what really matters—minimizing software interactions while maximizing Animal Refinement.
